

# AIR-OEAP1810 Access Point

## Overview

---

The 1810 Series offer a highly secure enterprise wireless and wired connection to the home, micro-branch, or other types of remote sites. The 1810 Series extends the corporate network to teleworkers, mobile workers and even micro-sites. The access points connect to the home or site broadband Internet access and establish a highly secure tunnel to the corporate network. This tunnel allows remote employees access to data, voice, video and cloud services for a mobility experience consistent with that at the corporate office. The 1810 Series supports highly secure access to corporate data and personal connectivity for teleworkers' home devices, with segmented home traffic.
