

DATA SHEET

ARUBA 387 SERIES OUTDOOR ACCESS POINTS

Dual 60GHz 802.11ad and 5GHz 802.11ac for high speed outdoor point-to-point connectivity

Weatherproof and temperature-hardened, the Aruba 387 Series Access Points deliver multi-gigabit per second aggregate throughput at distances up to 400 meters (or 0.25 miles).

With the ever-growing number of IoT devices, demand for reliable connectivity is rising – not just in traditional carpeted enterprises but also in outdoor use cases such as enabling connectivity across buildings on the same campus, adjacent structures (e.g. parking garage or annex), and remote or temporary event sites.

Point-to-point wireless solutions offer an attractive option for connecting two sites together where the right of way is difficult to obtain – or as a backup or recovery link for existing connections. But legacy point-to-point solutions can be expensive and vulnerable to inclement weather conditions. They can also require highly skilled workers for AP installation and alignment.

EXTREME WEATHER RESILIENCY AND RANGE

To solve these challenges, the 387 Series AP is designed with the resiliency needed during inclement weather and to survive harsh conditions. The 387 Series AP can withstand up to 165 mph winds and tolerate water, dust, and salt sprays for extended periods of time, and also provide connectivity at up to 400 meters. Should weather cause the 387 Series to become misaligned, Aruba's 60GHz radios can automatically adjust and align the point-to-point connection.

The 5GHz radio is also bonded with the 802.11ad radio to provide: 1) a boost in throughput in good conditions, and 2) intelligent fallback if the 60GHz radio is impacted by heavy rainfall.

KEY FEATURES

- Cost-effective and easy-to-deploy with automatic radio alignment
- High reliability with intelligent fallback to the 5GHz 802.11ac radio
- Up to 3.37 Gbps of aggregate throughput (60GHz: 2.5Gbps and 5GHz: 867Mbps)
- Up to 400 meters of extended range
- IoT-ready with integrated Bluetooth Low Energy (BLE)
- Based on a proven, hardened outdoor design
- Participates in Aruba's Dynamic Segmentation solution

SIMPLE, COST-EFFECTIVE DEPLOYMENT

From a deployment standpoint, the auto-adjustment feature can dramatically simplify labor requirements by eliminating the need for precision AP alignments during installation or weather impacts. APs can intelligently form links based on optimal parameters up to +/- 45 degrees azimuth* and +/- 17 degrees elevation. The 5GHz radio uses a fixed sector to cover the same range.

IOT-READY

The 387 Series includes an integrated Bluetooth Low Energy radio to simplify the deployment and management of location services, asset tracking services, security solutions

*At initial release the auto acquisition range is limited to
+/- 10 degrees @400m
+/- 20 degrees @300m
This will be extended in subsequent software releases.

and IoT sensors. This allows organizations to leverage the 360 Series as an IoT platform, which eliminates the need for an overlay infrastructure and additional IT resources.

ARUBA SECURE INFRASTRUCTURE

The Aruba 387 Series includes components of Aruba's 360 Secure Fabric to help protect user authentication and wireless traffic. Select capabilities include:

WPA3 and Enhanced Open

Support for stronger encryption and authentication is provided via the latest version of WPA for enterprise protected networks.

Enhanced Open offers seamless new protection for users connecting to open networks where each session is automatically encrypted to protect user passwords and data on guest networks.

WPA2-MPSK

MPSK enables simpler passkey management for WPA2 devices – should the Wi-Fi password on one device or device type change, no additional changes are needed for other devices. Requires ClearPass Policy Manager.

VPN Tunnels

In Remote AP (RAP) and IAP-VPN deployments, the Aruba 387 Series can be used to establish a secure SSL/IPSec VPN tunnel to a Mobility Controller that is acting as a VPN concentrator.

TRUSTED PLATFORM MODULE (TPM)

For enhanced device assurance, all Aruba APs have an installed TPM for secure storage of credentials and keys, and boot code.

SIMPLE AND SECURE ACCESS

To simplify policy enforcement, the Aruba 387 Series uses Aruba's policy enforcement firewall (PEF) feature to encapsulate all traffic from the AP to the Mobility Controller (or Gateway) for end-to-end encryption and inspection. Policies are applied based on user role, device type, applications, and location. This reduces the manual configuration of SSIDs, VLANs and ACLs. PEF also serves as the underlying technology for Aruba Dynamic Segmentation.

FLEXIBLE OPERATION AND MANAGEMENT

A unique feature of Aruba APs is the ability to operate in either controllerless (Instant) or controller-based mode.

Controller-less (Instant) mode

In controllerless mode, one AP serves as a virtual controller for the entire network. Learn more about Instant mode in this technology brief.

Mobility Controller mode

For optimized network performance, roaming and security, APs tunnel all traffic to a mobility controller for centrally managed traffic forwarding and segmentation, data encryption, and policy enforcement. Learn more in the ArubaOS datasheet.

Management options

Available management solutions include Aruba Central (cloud-managed) or Aruba AirWave – a multi-vendor on-premises management solution.

For large installations across multiple sites, APs can be factory-shipped and can be activated with Zero Touch Provisioning through Aruba Central or AirWave. This reduces deployment time, centralizes configuration, and helps manage inventory.

ADDITIONAL FEATURES

Zero Touch Provisioning

APs can be factory-shipped and zero-touch provisioned through Aruba Central or AirWave using a cloud-based service to reduce deployment time, centralize configuration, and manage inventory.

Advanced Cellular Coexistence (ACC)

Minimizes interference from 3G/4G LTE cellular networks, distributed antenna systems (DAS), and commercial small cell or femtocell equipment.

Hardened, industrial design

Extends the temperature range capabilities of indoor access points for environments that lack heating and cooling. It also provides sealed connector interfaces to protect against dust and moisture.

AP-387 SPECIFICATIONS

Wi-Fi Radio Specifications

- AP type: Outdoor hardened, dual radio, 60GHz 11ad and 5GHz 802.11ac 2x2 MIMO
- 60GHz 802.11ad 1x1 (2502.5 Mbps max rate) radio
 - 1 Spatial Stream for up to 2.5 Gbps
 - Internal scanning antenna
 - » +/- 45° Azimuth Scan
 - » +/- 17° Vertical Scan
- 5GHz 802.11ac 2x2 MU-MIMO (867 Mbps max rate)
 - Two spatial stream MIMO for up to 867 Mbps wireless data
 - Internal directional antenna 9 dBi
- Software-configurable dual radio supports 5GHz (Radio 0) and 60GHz (Radio 1)
- Supported frequency bands (country-specific restrictions apply):
 - 2.400 to 2.4835GHz (BLE)
 - 5.150 to 5.250GHz
 - 5.250 to 5.350GHz
 - 5.470 to 5.725GHz
 - 5.725 to 5.850GHz
 - 5.825 to 5.875GHz
 - 57 to 64GHz
- Available channels: Dependent on configured regulatory domain.
- Dynamic frequency selection (DFS) maximizes the use of available 5GHz RF spectrum.
- Supported radio technologies:
 - 802.11a/g/n/ac: Orthogonal frequency-division multiplexing (OFDM)
 - 802.11ad: Single carrier (SC)
- Supported modulation types:
 - 802.11a/g/n/ac: BPSK, QPSK, 16-QAM, 64-QAM, 256-QAM
 - 802.11ad: BPSK, QPSK
- Transmit power: Configurable in increments of 0.5 dBm for 5GHz
- Maximum EIRP (limited by local regulatory requirements):
 - 60GHz band: 40 dBm EIRP max
 - 5GHz band: 387: 34 dBm EIRP
- Maximum ratio combining (MRC) for improved receiver performance on 5 GHz.
- Cyclic delay/shift diversity (CDD/CSD) for improved downlink RF performance.

- Short guard interval for 20MHz, 40MHz, 80MHz on 5GHz.
- Low-density parity check (LDPC) for high-efficiency error correction and increased throughput.
- 802.11ac Transmit beam-forming (TxBF) for increased signal reliability and range
- 802.11ad Beam Steering
- Supported 11a/ac data rates (Mbps):
 - 802.11a 6, 9, 12, 18, 24, 36, 48, 54
 - 802.11n (5GHz): 6.5 to 600 (MCS0 to MCS15)
 - 802.11ac: 6.5 to 867 Mbps (MCS0 to MCS9, NSS = 1 to 2 for VHT20/40/80)
- 802.11n high-throughput (HT) support: HT 20/40
- 802.11ac very high throughput (VHT) support: VHT 20/40/80/160
- 802.11ad
- 802.11n/ac packet aggregation: A-MPDU, A-MSDU

Power

- Worst-case power consumption -13.5 W
- Idle power consumption 4.5W
- Power sources sold separately
- Power over Ethernet (PoE+): 802.3at-compliant
- Power over Ethernet (PoE): 802.3af with some operational restriction.
 - Max conducted power per chain for 5GHz drops to 19 dBm

Other Interfaces

- One 10/100/1000BASE-T Ethernet network interfaces (RJ-45)
 - Auto-sensing link speed and MDI/MDX
 - 802.3az Energy Efficient Ethernet (EEE)
- Bluetooth Low Energy (BLE) radio
 - Up to 4 dBm transmit power (class 2) and -91 dBm receive sensitivity
- Visual indicator (multi-color LED): For system and radio status
- Reset button: Factory reset (during device power up)
- Micro USB console interface

Mounting

- AP-270-MNT-V1
- AP-270-MNT-V2
- AP-270-MNT-H1*
- AP-270-MNT-H2*

*Recommended bracket solutions for most apps.

Mechanical

- Dimensions/weight (excluding mount adapter):
 - 18 cm (W) x 18 cm (D) x 10.1 cm (H)
 - 1.198 kg

Environmental

- Operating:
 - Temperature: -40° C to +60° C (-40° F to +140° F)
 - Humidity: 5% to 95% non-condensing
- Storage and transportation:
 - Temperature: -40° C to +70° C (-40° F to +158° F)
- Operating Altitude: 3,000 m
- Water and Dust
 - IP66/67
- Salt Tolerance
 - Tested to ASTM B117-07A Salt Spray 200hrs
- Wind Survival: Up to 165 Mph
- Shock and Vibration ETSI 300-19-2-4

Regulatory

- FCC/ISED
- CE Marked
- RED Directive 2014/53/EU
- EMC Directive 2014/30/EU
- Low Voltage Directive 2014/35/EU
- UL/IEC/EN 60950
- EN 60601-1-1, EN60601-1-2

For more country-specific regulatory information and approvals, please see your Aruba representative.

Regulatory Model Number

- AP-387: APEX0387

Certifications

- CB Scheme Safety, cTUVus
- UL2043 plenum rating
- Wi-Fi Alliance certified 802.11a/b/g/n/ac

Warranty

- Limited Lifetime Warranty

Minimum Operating System Software

- 8.4. AOS and 8.4 for Instant
- ArubaOS 10.0.0.0

RF PERFORMANCE TABLE		
	Maximum transmit power (dBm) per transmit chain	Receiver sensitivity (dBm) per receive chain
802.11a 5GHz		
6 Mbps	22	-90
54 Mbps	22	-73
802.11n HT20 5GHz		
MCS0/8	22	-93
MCS7/15	21	-71
802.11n HT40 5GHz		
MCS0/8	22	-90
MCS7/15	21	-68
802.11ac VHT20 5GHz		
MCS0	22	-93
MCS9	21	-68
802.11ac VHT40 5GHz		
MCS0	22	-90
MCS9	21	-63
802.11ac VHT80 5GHz		
MCS0	22	-87
MCS9	21	-61
802.11ad 60GHz		
MCS0	19	-
MCS9	19	-

Maximum capability of the hardware provided (excluding antenna gain). Maximum transmit power is limited by local regulatory settings.

ORDERING INFORMATION	
Part Number	Description
AP-387 Series Unified Outdoor Access Points	
R0K12A	Aruba AP-387 (JP) 802.11ac/ad 802.3at PoE Dual 5/60 GHz Integrated Antenna Outdoor Radio
R0K13A	Aruba AP-387 (RW) 802.11ac/ad 802.3at PoE Dual 5/60GHz Integrated Antenna Outdoor Radio
R0K14A	Aruba AP-387 (US) 802.11ac/ad 802.3at PoE Dual 5/60GHz Integrated Antenna Outdoor Radio
