

H3C S9820 Series Data Center Switches

Release Date: Nov,2022

New H3C Technologies Co., Limited

H3C S9820 Series Data Center Switches

Product overview

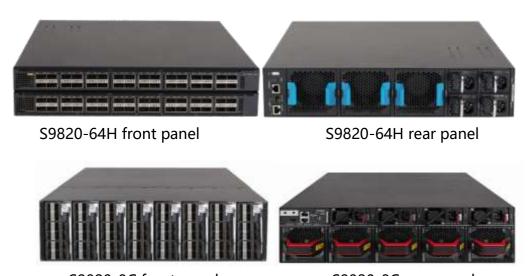

H3C S9820 series switches are a new generation of high-performance, high-density 400GE/100GE Ethernet switches launched by H3C for data centers. These switches provide high density

400GE/100GE/40GE/25GE/10GE ports; supports redundant pluggable power supplies and fans, and the fan direction can be flexibly adjusted. S9820s can be used for next-generation data center core.

S9820s can also connect to S12500 core switches through 400GE uplinks and 100GE switches in downlinks, providing high-bandwidth and large-capacity server access.

The S9820 switch series has two models:

- S9820-64H. The switch provides 64 × 100G QSFP28 ports
- H3C S9820-8C: supports 8 subslots, each card can provide up to 16 100GE ports or 4 400GE ports,
 S9820-8C provides up to 128 100G ports or 32 400G ports in total.

S9820-8C front panel

S9820-8C rear panel

Features and Benefits

High port density and powerful forwarding capacity

• The H3C S9820 series switches supports high-density 100GE/40GE/25GE/10GE ports, has powerful forwarding capabilities, and has flexible sub-card configurations, supporting a maximum of 32 400GE ports or 128 100GE ports, with extremely high port density and strong forwarding capability, can meet the needs of high-end data center high-density servers without networking requirements for convergent access.

Abundant data center features

The switch supports abundant data center features, including:

 H3C S9820 series switches supports MP-BGP EVPN (Multiprotocol Border Gateway Protocol Ethernet Virtual Private Network) which can run as VXLAN control plane to simplify VXLAN configuration, eliminate traffic flooding and reduce full mesh requirements between VTEPs via the introduction of BGP RR.

- H3C S9820 series switches support Fiber Channel over Ethernet (FCoE), which permits storage, data, and computing services to be transmitted on one network, reducing the costs of network construction and maintenance.
- H3C S9820 series switches support Priority-based Flow Control (PFC), Enhanced Transmission Selection (ETS) and Data Center Bridging eXchange (DCBX). These features ensure low latency and zero packet loss for FC storage, RDMA applications and high-speed computing services.

H3C Distributed Resilient Network Interconnection (DRNI)

- H3C S9820 series switches support DRNI(M-LAG), which enables links of multiple switches to aggregate into
 one to implement device-level link backup. DRNI is applicable to servers dual-homed to a pair of access
 devices for node redundancy.
- Streamlined topology: DRNI simplifies the network topology and spanning tree configuration by virtualizing two physical devices into one logical device.
- Independent upgrading: The DR member devices can be upgraded independently one by one to minimize the impact on traffic forwarding.
- High availability: The DR system uses a keepalive link to detect multi-active collision to ensure that only one member device forwards traffic after a DR system splits.

Powerful Visibility

With the rapid development of data center, the scale of the data center expands rapidly; reliability, operation and maintenance become the bottleneck of data center for further expansion. H3C S9820 series switches conform to the trend of automated data operation and maintenance, and support visualization of data center.

- INT (Inband-Telemetry) is a network monitoring technology used to collect data from the device. Compared with the traditional network monitoring technology featuring one query, one reporting, INT requires only one-time configuration for continuous data reporting, thereby reducing the request processing load of the device. INT can collect timestamp information, device ID, port information, and buffer information in real time.
- Provides a variety of traffic monitoring and analytic tools, including sFlow, NetStream, SPAN/RSPAN/ERSPAN
 mirroring, and port mirroring to help customers perform precise traffic analysis and gain visibility into network
 application traffic. With these tools, customers can collect network traffic data to evaluate network health status,
 create traffic analysis reports, perform traffic engineering, and optimize resource allocation.
- Supports realtime monitoring of buffer and port queues, allowing for visible and dynamic network optimization.
- Supports PTP (Precision Time Protocol) to achieve highly precise clock synchronization.

RoCE (RDMA over Converged Ethernet)

- Remote Direct Memory Access (RDMA) directly transmits the user application data to the storage space of the servers, and uses the network to fast transmit the data from the local system to the storage of the remote system.
 RDMA eliminates multiple data copying and context switching operations during the transmission process, and reduces the CPU load.
- RoCE supports RDMA on standard Ethernet infrastructures. H3C S9820 switches support RoCE and can be used to build a lossless Ethernet network to ensure zero packet loss.
- RoCE include the following key features, include PFC(Priority based Flow Control), ECN(Explicit Congestion Notification), DCBX(Data Center Bridging Capability Exchange Protocol), ETS(Enhanced Transmission Selection).

Flexible programmability

- The switch uses industry-leading programmable switching chips that allow users to define the forwarding logic as needed.
- Users can develop new features that meet the evolving trend of their networks through simple software updates.

Powerful SDN capacity

- H3C S9820 series switches adopt the next-generation chip with more flexible Openflow FlowTable, more resources and accurate ACL matching, which greatly improves the software-defined network (SDN) capabilities and meet the demand of data center SDN network.
- H3C S9820 series switches can interconnect with H3C SeerEngine-DC Controller through standard protocols such as OVSDB, Netconf and SNMP to implement network automatic deployment and configuration.

Comprehensive security control policies

- H3C S9820 series switch supports AAA, RADIUS and user account based authentication, IP, MAC, VLAN, port-based user identification, dynamic and static binding; when working with the H3C iMC platform, it can conduct real time management, instant diagnosis and crackdown on illicit network behavior.
- H3C S9820 series switch supports enhanced ACL control logic, which enables an enormous amount of
 inbound and outbound ACL, and delegate VLAN based ACL. This simplifies user deployment process and
 avoids ACL resource wastage. S9820 series switch can also take advantage of Unicast Reverse Path Forwarding
 (Unicast RFP). When the device receives a packet, it will perform the reverse check to verify the source address
 from which the packets are supposedly originated, and will drop the packet if such path doesn' t exist. This
 can effectively prevent the source address spoofing in the network.

Multiple reliability protection

- The S9820 series switch provides multiple reliability protection at both switch and link levels. With over
 current, overvoltage, and overheat protection, all models have a redundant pluggable power module, which
 enables flexible configuration of AC or DC power modules based on actual needs. The entire switch supports
 fault detection and alarm for power supply and fan, allowing fan speed to change to suit different ambient
 temperatures.
- The switch supports diverse link redundancy technologies such as H3C proprietary RRPP, VRRPE, and Smart Link. These technologies ensure quick network convergence even when large amount of traffic of multiple services runs on the network.

Flexible choice of airflow

• To cope with data center cooling aisle design, the H3C S9820 series switch comes with flexible airflow design, which features bi-cooling aisles in the front and back. Users may also choose the direction of airflow (from front to back or vice versa) by selecting a different fan tray.

Excellent manageability

The switch improves system management through the following ways:

• Provides multiple management interfaces, including the serial console port, mini USB console port, USB port,

two out-of-band management ports, and two SFP ports. The SFP ports can be used as in-band management port through which encapsulated sampling packets are sent to the controller or other management devices for deep analysis.

- Supports multiple access methods, including SNMPv1/v2c/v3, Telnet, SSH 2.0, SSL, and FTP.
- Supports standard NETCONF APIs that allow users to configure and manage the switch, enhancing the compatibility with third-party applications.

Hardware Specification

Item	S9820-64H	S9820-8C
Dimensions (H \times W \times D)	88.1× 440 × 540 mm (3.44 × 17.32 × 21.26 in)	130.5 × 440 × 760 mm (5.14 × 17.32 × 29.92 in)
Weight	≤ 18 kg (39.68 lb)	≤45kg
Console port	1	
Out-of-band management port	One GE copper port and one GE fiber port	
Mini USB port	1	
USB port	1	
QSFP28 port	64	N/A
Expansion slot	N/A	8(16 100G ports or 4 400G ports per slot)
CPU	2.2GHz @4Cores	
Flash/SDRAM	4GB/8GB	
Latency	< 1 μs	
Buffer	42M	64M
Switching capacity	12.8 Tbps	25.6Tbps
Forwarding capacity	4400 Mpps	7655.5Mpps
AC-input voltage	90 VAC to 264 VAC	90-290 VAC
DC-input voltage	−40 VDC to −72 VDC	N/A
Power module slot	4	
Fan tray slot	3	5
Air flow direction	From front to rear or from rear to front	
Static power consumption	Dual AC: 336W	Dual AC:305W
Typical power consumption	Dual AC: 519W	Dual AC:1132W
Maximum heat consumption		
(BTU/hour)	3190	6923
MTBF(years)	23.31	
MTTR(hour)	1	
Operating temperature	0°C to 45°C (32°F to 113°F)	
Operating humidity	10% to 90%, noncondensing

Item	Feature description
IPv6 routing	PBR
	Support L3 MPLS VPN(S9820-8C exclude)
	Support L2 VPN: VLL (Martini, Kompella) (S9820-8C exclude)
	Support MPLS OAM(S9820-8C exclude)
MPLS/VPLS	Support VPLS, VLL(S9820-8C exclude)
	Support P/PE function(S9820-8C exclude)
	Support LDP protocol (S9820-8C exclude)
	Support MCE
	IGMP snooping
	MLD snooping
	IPv4 and IPv6 multicast VLAN
	IPv4 and IPv6 PIM snooping
Multicast	IGMP and MLD
	PIM and IPv6 PIM
	MSDP
	Multicast VPN
	LACP
	STP/RSTP/MSTP protocol, PVST compatible
	STP Root Guard and BPDU Guard
	RRPP and ERPS
Reliability	Ethernet OAM
Kellability	Smartlink
	DLDP
	BFD for OSPF/OSPFv3, BGP/BGP4, IS-IS/IS-ISv6, PIM/IPM for IPv6 and Static route VRRP and VRRPE
	Weighted Random Early Detection (WRED) and tail drop
	Flexible queue scheduling algorithms based on port and queue, including strict priority (SP), Weighted Deficit Round Robin (WDRR), Weighted Fair Queuing (WFQ), SP + WDRR, and SP + WFQ.
	Traffic shaping
QOS	Packet filtering at L2 (Layer 2) through L4 (Layer 4); flow classification based on source MAC address, destination MAC address, source IP (IPv4/IPv6) address, destination IP (IPv4/IPv6) address, port, protocol, and VLAN to apply qos policy,including mirroring,redirection,priority remark etc.
	Committed access rate (CAR)
	Account by packet and byte
	COPP
	gRPC
	ERSPAN
Telemetry	Mirror on drop
	Telemetry Stream
	INT
	iNQA
	Packet trace, Packet capture
	Console telnet and SSH terminals
Configuration and maintenance	SNMPv1/v2/v3
Comiguration and maintenance	SININI V 1/ VE/ VS

Item	Feature description
	System log
	File upload and download via FTP/TFTP
	BootRom update and remote update
	NQA
Configuration and maintenance	ping,tracert
	NTP
	PTP(1588v2)
	GIR Graceful Insertion and Removal
	Hierarchical management and password protection of users
	Authentication methods,including AAA,RADIUS and HWTACACS
	Support DDos, ARP attack and ICMP attack function
	IP-MAC-port binding and IP Source Guard
	SSH 2.0
Security and management	HTTPS
	SSL
	PKI
	Boot ROM access control (password recovery)
	RMON

	static IPv6 routing table	2K	2K

Data Center Application

The typical data center application is an EVPN-VxLAN design, S9820 series switches work as spine or spine/border, S68XX series work as leaf and border or ED. From this design. The users can get a non-blocking large L2 system.

Order information

PID	Description	
LS-9820-64H	H3C S9820-64H L3 Ethernet Switch with 64 QSFP28 Ports	
LS-9820-8C	H3C S9820-8C L3 Ethernet Switch with 8*Interface Module Slots	
Power		
LSVM1AC650	650W AC Power Supply Module(for S9820-64H)	
LSVM1DC650	650W DC Power Supply Module(for S9820-64H)	
PSR1600B-12A-B	1600W AC Power Supply Module (Power Panel Side Exhaust Airflow) (for S9820-8C)	
Fan		
LSWM1BFANSCB	Fan Module with Port to Power Airflow(for S9820-64H)	
LSWM1BFANSC	Fan Module with Power to Port Airflow(for S9820-64H)	
FAN-80B-1-B	Fan Module (Fan Panel Side Exhaust Airflow) (for S9820-8C)	
LSW-WA-A	H3C S9820-8C Switch Cable Management Frame (for S9820-8C)	
LSVM1BSR10	H3C S9810 Bottom Support Rails,630mm~900mm (for S9820-8C)	
Module		
LSWM116H	16-Port QSFP28 Ethernet Optical Interface Module (for S9820-8C)	
LSWM1M4CD	4-Port 400GBASE Ethernet Optical Interface Module(QSFP-DD) (for S9820-8C)	
Transceiver		

H3C S9820 Series Data Center Switches

PID	Description
QSFP-100G-SR4-MM850	100G QSFP28 Optical Transceiver Module (850nm,100m OM4,SR4,MPO)
QSFP-100G-LR4-WDM1300	100G QSFP28 Optical Transceiver Module(1310nm,10km,LR4,WDM,LC)
QSFP-100G-PSM4-SM1310	100G QSFP28 Optical Transceiver Module (1310nm,500m,PSM4,MPO/APC)
QSFP-100G-LR4L-WDM1300	100G QSFP28 Optical Transceiver Module (1310nm,2km,LR4L,CWDM4,LC)
QSFP-100G-ER4L-WDM1300	100G QSFP28 Optical Transceiver Module (1310nm,40km,ER4L,WDM,LC)
QSFP-40G-LR4-WDM1300	QSFP+ 40GBASE Optical Transceiver Module (1310nm,10km,LR4,LC)
QSFP 40G CSR4 MM850	QSFP+ 40GBASE Optical Transceiver Module (850nm,300m,CSR4,Support 40G to 4*10G)
QSFP-40G-SR4-MM850	QSFP+ 40GBASE Optical Transceiver Module (850nm,100m,SR4,Support 40G to 4*10G)
QSFP-40G-LR4-PSM1310	QSFP+ 40GBASE Optical Transceiver Module (1310nm,10km,MPO/APC,LR4,Parallel Single Mo
QSFP-40G-LR4L-WDM1300	QSFP+ 40GBASE Optical Transceiver Module (1310nm,2km,LR4L,LC)
QSFP-40G-BIDI-SR-MM850	QSFP+ 40GBASE BIDI Optical Transceiver Module (850nm,100m,SR)
SFP-GE-LH80-SM1550	1000BASE-LH80 SFP Transceiver, Single Mode (1550nm, 80km, LC)
SFP-FE-LX-SM1310-A	100BASE-LX SFP Transceiver, Single Mode (1310nm, 15km, LC)
SFP-FE-SX-MM1310-A	100BASE-FX SFP Transceiver, Multi-Mode (1310nm, 2km, LC)
SFP-FE-LH40-SM1310	100BASE-LH40 SFP Transceiver, Single Mode (1310nm, 40km, LC)
SFP-GE-LX-SM1310-A	1000BASE-LX SFP Transceiver, Single Mode (1310nm, 10km, LC)
SFP-GE-LH40-SM1310	1000BASE-LH40 SFP Transceiver, Single Mode (1310nm, 40km, LC)
SFP-GE-LH40-SM1550	1000BASE-LH40 SFP Transceiver, Single Mode (1550nm, 40km, LC)
SFP-GE-SX-MM850-A	1000BASE-SX SFP Transceiver, Multi-Mode (850nm, 550m, LC)
SFP-GE-T	SFP GE Copper Interface Transceiver Module (100m,RJ45)
Cable	
QSFP-100G-D-CAB-1M	100G QSFP28 to 100G QSFP28 1m Passive Cable
QSFP-100G-D-CAB-3M	100G QSFP28 to 100G QSFP28 3m Passive Cable
QSFP-100G-D-AOC-7M	100G QSFP28 to 100G QSFP28 7m Active Optical Cable
QSFP-100G-D-AOC-10M	100G QSFP28 to 100G QSFP28 10m Active Optical Cable
QSFP-100G-D-AOC-20M	100G QSFP28 to 100G QSFP28 20m Active Optical Cable
QSFP-100G-D-CAB-5M	100G QSFP28 to 100G QSFP28 5m Passive Cable
QSFP-100G-4SFP-25G-CAB-1M	100G QSFP28 to 4x25G SFP28 1m Passive Cable
QSFP-100G-4SFP-25G-CAB-3M	100G QSFP28 to 4x25G SFP28 3m Passive Cable
QSFP-100G-4SFP-25G-CAB-5M	100G QSFP28 to 4x25G SFP28 5m Passive Cable
LSWM1QSTK0	40G QSFP+ Cable 1m
LSWM1QSTK1	40G QSFP+ Cable 3m
LSWM1QSTK2	40G QSFP+ Cable 5m
LSWM1QSTK3	40G QSFP+ to 4x10G SFP+ Cable 1m
LSWM1QSTK4	40G QSFP+ to 4x10G SFP+ Cable 3m
LSWM1QSTK5	40G QSFP+ to 4x10G SFP+ Cable 5m
QSFP 40G D AOC 7M	40G QSFP+ to 40G QSFP+ 7m Active Optical Cable
QSFP-40G-D-AOC-10M	40G QSFP+ to 40G QSFP+ 10m Active Optical Cable
QSFP-40G-D-AOC-20M	40G QSFP+ to 40G QSFP+ 20m Active Optical Cable
